### Interim Summary

Site seems to be a land/~~water~~ water interface with bldgs in immediate vicinity. water is brown, murky, with somewhat fetid smells + much water - + water's edge type vegetation; it is still + rather smelly. Insect noise is present. Buildings are cubicle, light colored pebbly-textured, of differing heights set in a slightly rolling, vegetated "almost ~~like a swamp~~ <sup>the area</sup> setting. ~~It~~ has a warm, balmy "Southern-like" feel - ~~to~~ almost semi-tropical.

Water is still & has organic smells, much vegetation & animal/insect life typical to it, but is fresh & the way it naturally should be.

Site has a central building bordered by other structures, winding landscaped walkways with trees & many bird sounds. The main building has a quiet almost "vermont" atmosphere. Stairs lead up to areas of interest which are cavernous with several smaller rooms of differing sizes. Bldg aims seems to be dissemination of <sup>specialized</sup> knowledge on a medium, low-key scale. People present include women who are probably receptionist, and are happy, friendly, enthusiastic, warm and give some print membership, devotes, and outside ~~visitors~~ visitors. ~~Site~~ Site seems to evoke a sense of memorial, but with an ongoing purpose of service as that memorial. Site strongly brings to mind A.R.E. Books & a library are present and ~~also~~ serve as an important part of the site. It has an "almost" university feel, but more exclusive.
